

Senior Web Application Developer Frontend (m/f/d)

User-friendly and appealing interfaces for complex technical systems – if you are up to the challenge, join us in our efforts to make the web a better place.

Your tasks ...

- » Development of websites and web applications
- » Involvement in a wide range of projects based on different tech stacks
- » Conception, architecture and implementation of digital products
- » Working in close cooperation with the backend team
- » Creating clean, maintainable and reusable code
- » Developing accessible and user centered solutions
- » Continually improving your skills and spreading your knowledge within the team

Your qualifications ...

We expect skills in the following areas:

- » Modern JavaScript development for complex applications
- » In particular, experience in working with JavaScript frameworks for web applications (based on Vue.js, React, etc.)
- » Development of single-page and classic applications
- » Use of build tools
- » Contemporary and standards-compliant web techniques, HTML and CSS proficiency
- » Knowledge of common design patterns to build user-friendly interfaces

We consider the following additional qualifications to be positive, but they are not a prerequisite:

- » Accessibility
- » UX, usability, interaction design, information architecture
- » Web design

We expect ...

- » Several years of work experience, relevant education or references in the field of web development
- » Personal commitment, positive work attitude and willingness to learn
- » Willingness to work both as part of a team and independently
- » High quality awareness
- » Willingness to work across disciplines
- » Very good knowledge of German and/or English
- » EU citizenship or a valid work permit for Austria

Senior Web Application Developer Frontend (m/f/d)

We offer ...

- » Permanent full-time position (38.5 h per week)
- » Flexible working times and fair working conditions
- » Qualification and certification opportunities
- » Being part of a committed and supportive team
- » Regular team activities
- » Flexible home office solution available after onboarding period
- » Office in a central location in the city of Vienna

The minimum gross salary corresponds to the IT collective agreement: EUR 3,455 per month (ST1 standard level 2023) or EUR 3,910 per month (ST1 experience level 2023), but may be higher depending on professional qualifications and experience.

About us ...

WIENFLUSS (www.wienfluss.net) develops sophisticated web solutions for renowned clients. In the field of digital accessibility we are one of the leading agencies in Austria.

Your application

We look forward to receiving your application:

- » Letter of motivation
- » Curriculum vitae and references
- » Salary expectations
- » For non-EU citizens: information about the work permit

Send your application in German or English to: jobs@wienfluss.net.

We do not accept applications from freelancers or agencies.

If we consider your application, you will receive a short questionnaire to self-assess your qualifications.
