

## Web Application Developer Python (m/f/d)

WIENFLUSS is developing sophisticated and user-friendly web sites and web applications – if you are up to the challenge, join us in our efforts to make the web a better place.

### ***About the position ...***

You will be part of the development team for a web application that helps thousands of European local authorities to establish and maintain effective energy and climate policies.

The application is currently being implemented based on the following tech stack: Python, Pytest, PostgreSQL, SQLAlchemy, FastAPI, Vue.js, Redis, OSO, nginx, Tolgee, Docker and Traefik.

### ***Your role ...***

As part of the project team you'll be:

- » Implementing backend APIs for the frontend application as well as third party applications
- » Ensure a performant and secure application
- » Develop for scalability, reliability and sustainability
- » Mapping a highly complex real life programme into an easy to use application
- » Preparing a production hosting environment that ensures high availability and easy maintenance
- » Code reviews and writing tests
- » Participate in application architecture decisions

### ***Your qualifications ...***

We expect skills in the following areas:

- » Python-based application development
- » Modern software development practices
- » Standards-based web development
- » Knowledge and professional experience with API applications using an equivalent tech stack

Additional optional skills and qualifications:

- » Django web framework
- » Experience with best practice dev-ops concepts
- » Full stack development with frontend frameworks (e.g. Vue.js, React etc.)
- » Working with observability tools such as Elastic and Sentry

### ***We expect ...***

- » At least four years of relevant experience in the field of web or application development
- » Positive work attitude and willingness to learn
- » Team player with a high level of personal responsibility
- » High quality awareness
- » Willingness to work in an interdisciplinary manner
- » Very good knowledge of German and / or English
- » EU citizenship or a valid work permit for Austria

## Web Application Developer Python (m/f/d)

### ***We offer ...***

- » Permanent full-time position
- » Flexible working hours and fair working conditions
- » Training opportunities
- » Being part of a committed and supportive team
- » Regular team activities
- » Flexible work from home solution available
- » Office in a central location in the city of Vienna

The minimum full-time gross salary corresponds to the IT collective agreement: starting from € 4.350 (ST1 senior level 2025) € 3.843 per month (ST1 regular level 2025), but may be higher depending on professional qualifications and experience. The salary will be paid 14 times a year.

### ***About us ...***

WIENFLUSS ([www.wienfluss.net](http://www.wienfluss.net)) develops sophisticated web solutions for renowned clients.

In the field of digital accessibility we are one of the leading agencies in Austria.

We are based in central Vienna near MuseumsQuartier. You will work in a team of 17 people with different backgrounds and expertise.

### ***Your application***

We look forward to receiving your application:

- » Cover letter / letter of motivation
- » Curriculum vitae and references
- » Salary expectations
- » For non-EU citizens: information regarding your work permit

Please send your application in German or English to: [jobs@wienfluss.net](mailto:jobs@wienfluss.net).

We do not accept applications from freelancers or agencies.

If we consider your application, you will receive a short questionnaire to self-assess your qualifications.
